

Oriza Sativa Fiojati

Jakarta, Indonesia | +6281214432006 | oriza.sativa.fiojati@gmail.com | linkedin.com/in/oriza-sativa-fiojati

Fullstack Developer with experience in engineering scalable web applications using Golang, React, Next.js, and TypeScript. Proficient in microservices architecture, REST API integration, master data management with Prisma ORM, and implementing Role-Based Access Control (RBAC). Adept at building operational dashboards, checkout flows, and CMS, solving complex bugs, and collaborating cross-functionally to deliver maintainable, high-performance systems.

EDUCATION

GUNADARMA UNIVERSITY

S1 Informatics

Depok, Indonesia

Jun 2019 - Sep 2023

- Current GPA: 3.84/4.00
- Research 1: Comparison of InceptionV3 and EfficientNetB0 Algorithms in Dog Breed Image Classification
- Research 2: Topic Modeling in Tokopedia App Reviews Using Latent Dirichlet Allocation

EXPERIENCE

VOTERA.ID

Freelance Frontend Programmer

Apr 2025 – Present

- Built and implemented the frontend architecture for the Checkout System and Content Management System (CMS) using React.js and Tailwind CSS to support seamless transactions and dynamic content management.
- Developed responsive, mobile-first user interfaces for voting pages, user profiles, and administrative dashboards.
- Standardized UI/UX components across all web pages to enhance interface consistency and user experience.
- Implemented an automated CI/CD pipeline using GitHub Actions, streamlining production deployments triggered by Git tagging strategy on the main branch.
- Managed end-to-end SDLC processes—from requirements gathering, UI implementation, and testing, to live deployment.
- Leveraged Notion for agile task tracking, feature roadmap planning, and rapid iteration delivery aligned with client feedback.

PT. Infracom Technology

Internship Fullstack Developer

Aug 2025 – Feb 2026

- Engineered and maintained modular backend services utilizing Golang and Microservices architecture to ensure high scalability and system maintainability.
- Developed and deployed an Asset Management web application using Golang and Next.js, featuring end-to-end asset lifecycle tracking, automated approval workflows, and interactive monitoring dashboards.
- Built Request System & CMS web applications from the ground up using Golang, React (TypeScript), and Tailwind CSS for streamlined internal operations.
- Designed and implemented Master Data Management modules with full CRUD capabilities and efficient data modeling using Prisma ORM.
- Analyzed and mapped complex business processes for the Vehicle Operation Request System using structured flow diagrams (draw.io).
- Conducted active debugging and troubleshooting across internal systems, including resolving issues for the Preventix platform.

PT MITRA TEKNOLOGI GEMILANG

Internship Backend Programmer

Depok, Indonesia

Oct 2023 – Nov 2023

- Contributed to the development of the "Tactical and Operational Support System" application for the Regional Police of Yogyakarta (Polda DIY) using Python

SKILLS

Programming Languages: Golang, TypeScript, JavaScript, Python

Frontend Frameworks & Libraries: React.js, Next.js, Tailwind CSS, HTML5/CSS3

Backend & Architecture: REST API Design & Integration, Microservices Architecture

Databases & ORM: Prisma ORM, BigQuery

DevOps & Developer Tools: Git, GitHub Actions (CI/CD), Postman, Apidog, Notion, draw.io

Methodologies & Practices: Agile / Scrum, SDLC, Debugging, UI/UX Collaboration, Responsive Web Design
